

The next generation of abatement containment products. BearAcade™ allows isolation of the work space from the outside environment, creating a controlled contained environment when removing harmful materials such as asbestos, lead, and mold.

FEATURES, ATTRIBUTES, AND BENEFITS:

- ★ BearAcade™ significantly outperforms commonly used methods of containment - Accomplishes this goal by creating and maintaining a sealed environment for the time needed to complete the work
- ★ Custom applicators allow this system to be installed at an average 10x faster than traditional containments, criticals at least 2x faster - Less ladder time and gets you off your knees
- ★ Designed for containment applications with the help of professional abatement contractors and highly trained engineers
- ★ Reduces overall costs, improves profits, and wins more contracts
- ★ BearAcade™ containments withstand 50% more negative pressure required for asbestos containments with no billowing
- ★ Complies with Containment Standards
- ★ Stocked in Standard and Fire Retardant- Multi-Purpose & Carpet
- ★ Floors are not slippery, since each layer is bonded to the surface below it
- ★ Easy to clean and vacuum
- ★ Self-adhesive film keeps leaks from spreading, not allowing the release of contaminants into the environment
- ★ By reducing the time spent on ladders, on knees and bending, workmen's comp. rates can be lowered
- ★ Printed with the BearAcade™ trademark, providing confidence

The BearAcade™ Way

Easy to Remove

BearAcade™ on Lockers

The BearAcade™ Products line is dedicated to improving the abatement of noxious materials by bringing new technology and methods that result in improved isolation containments. A new way of building containments has been developed to address both the quality and lower overall costs. New materials consisting of adhesives that are removable but have the holding power to provide containments that will not fail, and methods of building containments, including applicators that can deliver ten times the average square foot per man hour have been developed. "The BearAcade Way™" was developed and tested by abatement contractors to insure real world performance on the job.

- ★ Free samples are available to determine suitability for job surfaces
- ★ Free CD-Rom is available to demonstrate the exceptional product qualities and to provide helpful hints for installation
- ★ Unique Applicators reduce the need for ladders, making for easy installation, (up to 10' high without leaving the ground)

EASY CLEANUP

- ★ The new generation BearAcade™ has two versions - Multi-Surface BearAcade™ that can be used on wall and floor surfaces and BearAcade™ CC, created for carpets only, with a more aggressive adhesive! Both are available in fire retardant.
- ★ The state of the art adhesive used on BearAcade™ allows for an easy removal of the film from all surfaces. BearAcade™ also has a new clean look.
- ★ True BearAcade™ has the BearAcade™ logo printed right on the film.
- ★ Don't be fooled by cheap imitations - true BearAcade™ has the "Genuine BearAcade" Seal on the box.

Floor and Wall Applicators
